

Press Release

MAAG Group acquires AMN DPI

Oberglatt, Switzerland, May 03, 2022 - MAAG Group has acquired the French tool manufacturer AMN DPI (AMN) effective 02.05.2022. Maag is thus consistently continuing its path as an integrated supplier for systems in the plastics industry from extruder tip.

Founded in 1979 and based in Normandy, AMN, a developer and manufacturer of polymer pelletizing dies and die plates, brings a wide range of know-how to the MAAG Group for both the processing and the extrusion and recycling industries. The globally positioned company with expertise also in biodegradable, highly filled recycling materials concentrates its activities primarily on the European market.

Ueli Thürig, President of the MAAG Group, comments: "For us, the acquisition is a consistent further step towards even greater customer centricity. Toolmaking for granulators and systems can now be carried out completely in-house. This increases the availability and delivery reliability of Maag products, and production times are reduced."

AMN's die plate production also increases Maag's service thanks to increased support options for continuous operation at the customer's site.

About the MAAG Group

The MAAG Group is a broadly diversified global solutions provider with integrated and customizable systems in process technology for the polymer, chemical, petrochemical, pharmaceutical and food industries. Its Pump & Filtration Systems, Pelletizing & Pulverizing Systems, Recycling Systems and Digitalization divisions consolidate the many years of experience and in-depth know-how of the AUTOMATIK, ETTLINGER, GALA, MAAG, REDUCTION, SCHEER and XANTEC product brands. The MAAG Group currently employs over 1,100 people at production sites in Switzerland, Germany, Italy, the USA, and China. Additional sales and service centers in France, Malaysia, India, Thailand and Brazil ensure close attention to customers' needs. For more information visit www.maag.com.

The MAAG Group is a business unit of Pumps & Process Solutions, a segment of the Dover Corporation.

About AMN

Based in Port-Jérôme Sur Seine Normandy, the company was founded in 1979 and has built its reputation upon the performance of its products and its successful innovations such as the Tungsten Carbide Cutting Face (TCT) or the Bimetallic Knife (BMS).
