

## Press Release

### Road2K: AMN DPI for the first time at the MAAG Group booth at K-2022

Oberglatt, Switzerland, August 11, 2022 - In May 2022, MAAG Group acquired the French tool manufacturer AMN DPI (AMN), thus continuing its growth as an integrated supplier of systems for the plastics industry.

For the first time, a complete AMN Central Injection System (CIS) consisting of a 1500 mm diameter die plate with a central water injection and sword shaped knives will be displayed at the K-Show (Recycling Hall 9, Stand A02). CIS was designed to improve pellet cooling and ejection and is an effective solution for high melt index or peroxidized polymers.

MAAG Group systems play a key role in the plastics circular economy. Along with keeping post-industrial and post-consumer waste in the value chain, we provide technologies that target the efficient use of resources; an additional factor in sustainability. In this context, the products of the globally positioned AMN complement the MAAG Group portfolio and provide additional value to customers for all polyolefin applications.

Die plates are the heart of the underwater pelletizing system; necessary to produce high quality and consistent pellets. Over many years, the unique technologies of AMN die plates have demonstrated their performance and longevity in many applications, especially for high capacity underwater pelletizers.

Visit us at the K show and let us show you how the AMN perforated plates combined with the other products in the range complete the MAAG portfolio.

Read more information, especially about our appearance at the K-2022, in the monthly updated Road2K News on our website: <https://maag.com/de/maag-news/>

**About the MAAG Group**

The MAAG Group is a broadly diversified global solutions provider with integrated and customizable systems in process technology for the polymer, chemical, petrochemical, pharmaceutical and food industries. Its Pump & Filtration Systems, Pelletizing & Pulverizing Systems, Recycling Systems and Digitalization divisions consolidate the many years of experience and in-depth know-how of the AMN, AUTOMATIK, ETTLINGER, GALA, MAAG, REDUCTION, SCHEER and XANTEC product brands. The MAAG Group currently employs over 1,250 people at production sites in Switzerland, Germany, Italy, the USA, and China. Additional sales and service centers in France, Malaysia, India, Thailand and Brazil ensure close attention to customers' needs. For more information visit [www.maag.com](http://www.maag.com).

The MAAG Group is a business unit of Pumps & Process Solutions, a segment of the Dover Corporation.

**About AMN**

Based in Port-Jérôme Sur Seine Normandy, the company was founded in 1979 and has built its reputation upon the performance of its products and its successful innovations such as the Tungsten Carbide Cutting Face (TCT) or the Bimetallic Knife (BMS).
